

Token WhitePaper

Mission Statement

Our is a unique cryptocurrency which allows investors to take an active role in saving black people's lives & helping to get their rights back!

Martin Luther king, started to fight against the oppression of black people, creating the largest revolution on the face of the earth, finally black people started to get their rights back.

Many years have passed, We have rights, but not enough, we are not privileged like others.

That's why we founded BLACKLIVESMATTER Token. We know that very few of us are able to just decide to travel to where Protests are needed most, but what we can all do is intentionally choose to support projects and companies that make the world a better place. At BLACKLIVESMATTER, we don't just say that's our top priority, we prove it. In less than a week, we raised over \$250,000 and made our first official donation of \$10,000 to Black Lives Matter - Los Angeles. Cryptocurrencies are changing the game for humanitarian efforts with their versatility and accessibility, and BLACKLIVESMATTER plans to be on the forefront of this innovation. We crafted a token that rewards holders for supporting charities with an automatic 3% redistribution on each transaction and put it on the BSC network, so even your spare change can change people's lives.

From Humble Beginnings

Some people in life simply have a higher calling, a drive within themselves to improve the world around them. We see this clearly in history but don't always recognize it when it's happening around us. Our founder is one of those rare people who feels guided in this way, and it is with his vision that we will define future generations.

From a very young age, he knew that he wanted to devote his life to humanitarian efforts. He attended law school, hoping to gain the tools to create the change he wanted to see in the world. While this was the traditional route to starting an organization, like so many of us here, he found cryptocurrency to be a turning point. His

success taught him that anything is possible in the cryptoworld, and enabled us to launch the innovative project, Our Token.

A Winning Team

Our Founder would not have been able to complete such a profound movement without the combined efforts of our Co-Founder. After meeting, they quickly realized they shared a vision for a better future and began discussing how they could bring it into existence. This project is the product of countless sleepless nights spent analyzing not just the direction of the project, but the fundamentals of making it work in the real world. It's to these endless shared hours that we owe our success.

Our organization moves forward holding that same sense of partnership as our compass.

Current Accomplishments

We Will list on IndoEx, a top 100 exchange with 1.6 billion daily volume (more than WhiteBit)

Blockfolio listing confirmed with over 550+ upvotes and 320 comments within a few hours

Ranked #1 and then #2 position on PooCoin, generating exponential interest in the movement

CoinGecko listing confirmed

Launching new and improved website Renounced ownership and Doxxed team

Multiple AMAs completed and many more to come

Future Plans

Building partnerships with additional charities to expand existing and future opportunities

Forging relationships with popular influencers, like Lewis Hamilton, to promote to a wider audience

In communication with BBC News as part of Blacklivesmatter' expansion into mainstream media, allowing us to reach further than any other charity token project on the market

Build and launch the Blacklivesmatter Foundation

Our Token

\$BLACKLIVESMATTER was launched on April 27rd, 2021, and wasted no time becoming a serious contender in the crypto space.

Within the first 24 hours, \$BLACKLIVESMATTER surpassed all expectations with approximately \$1,300,000 in volume.

Within its first week, \$BLACKLIVESMATTER has raised over \$250,000 for charity, and that's with only a fraction of our current holders.

BLACKLIVESMATTER has already donated \$10,000 to the charity, and our next contribution is already underway.

Tokenomics

- 2,000,000,000 initial token supply on BSC blockchain for lightning fast orders and minimal fees
- Autolock function sends donations into a multisign wallet which requires verification from at least five members of the founding team to securely access and distribute donation funds

10% tax on each transaction

- 5% goes to the Charity Wallet for all donations and projects
- 3% is redistributed to all holders proportionately
- 2% is Burned, to decrease liquidity

Donations

Donations are decided through a community poll system, allowing for unparalleled advocacy among our holders.

All these donations are livestreamed and recorded to ensure absolute transparency.

We will be unifying our efforts and coordinating with multiple charities to maximize the impact of BLACKLIVESMATTER in its early stages.

The BLACKLIVESMATTER Foundation

While we are currently endeavoring to support existing charities, our ultimate goal is to bypass the middleman and start our own independent organization. Our community said they want more direct involvement than a third party charity provides, and we listened. Launching the BLACKLIVESMATTER Foundation means that you, our team, and our volunteers will be personally involved in directing relief efforts.

This is the only cryptocurrency which is putting the power in your hands by changing the way humanitarian tokens interact with those in need.

Audit

Our Audit was completed in April, 2021, by TechRate in order to:

- Ensure that the smart contract functions as intended

- Identify potential security issues with the smart contract

We are proud to announce that BLACKLIVESMATTER passed this audit in all 21 categories.
